Profile

Software engineer with 4 years of experience in 2 projects.

Strong professional skills in Front-end developing. Have experience with bootstrapping front-end from zero on React, Redux.

Bootstrapping layouts with Tailwind CSS or ChakraUI and customizing them. Adaptive site design. Work as HTML5 developer with mobile platforms. Have experience with JSON and worked with REST API.

My constant goal is to understand the client's business requirements and produce a maintainable code of high quality.
